## (57) Abstract:

**PURPOSE:** To obtain a cosmetic, containing a polyglycerol ester of a fatty acid, excellent in emulsifying, solubilizing or dispersing functions blended therein and capable of maintaining the stable emulsified, solubilized or dispersed state for a long period.

**CONSTITUTION:** This cosmetic contains an ester of a linear polyglycerol which is a polyglycerol composition having 3-15 average polymerization degree and  $\leq 5\text{wt.}\%$  total content of  $\geq 2\text{C}$  branched structural and cyclic structural substances produced by the condensation of a linear polyglycerol without preferably containing the branched and cyclic structural substances with a fatty acid.
